Cover: Much is happening on the nuclear education and R&D front. The World Nuclear University (WNU) completed its first Summer Institute, the Department of Energy's Center for Advanced Energy Studies in Idaho started plotting out a research agenda, and nuclear engineering programs across the country—such as the relatively new ones at South Carolina State University (SCSU) and the University of South Carolina and the veteran program at Idaho State University—are continuing their efforts to promote nuclear's renaissance. Featured on the cover are students, faculty, and staff from SCSU (left photo) and fellows from the WNU's Summer Institute (right photo). An article on some of what's happening in nuclear engineering education and training begins on page 28. (Left photo: SCSU/Rolando Davis; right photo: Bob Seidel/imediaMagic LLC)
